

Nearly half of all UK businesses experienced a cyber attack in the last 12 months*.

When this happens to you, what will you do?

A data breach could put the future of your business at risk. Most UK business will hold some kind of personal data, from personnel files to customer email addresses, and they all need to be compliant with data protection legislation.

What would a cyber attack mean for your business?

A cyber attack can have serious consequences on your business, from shutting systems down and preventing access to important data, to stopping you from trading altogether.

Most SMEs won't know how to deal with a cyber attack, and will need expert advice to help manage the problem.

Can you afford a data breach?

When you suffer a cyber attack, any loss of personal information can be complex and time consuming to deal with, and the new General Data Protection Regulations (GDPR) will mean heavy fines if you do not comply with requirements.

The cost of fixing the problem, restoring systems and getting back on track can run into thousands of pounds for SMEs*, and with potential ICO fines on top, could put some companies out of business.

Not only are the financial implications huge, but the effect on your brand can be disastrous. Will your customers trust you with their details and their business?

How will Cyber Recovery help you to survive a data security breach?

Cyber Recovery is an insurance policy aimed at businesses with a turnover of less than £5m. Should a cyber attack or data breach occur, the policy is designed to provide policyholders with a Cyber Expert to help them survive such an attack.

Policyholders are provided with access to the Lorega Cyber Emergency Response Team who will provide help in managing the crisis from the moment you report an eligible incident to us. Expert advice will be on hand following a relevant data security breach where personal information is copied, transmitted, viewed or stolen by an unauthorised third party.

As long as the breach occurred in the UK, our experts will investigate and assist with the restoration of your systems, liaise with the ICO and help you to communicate with your customers to limit the damage to your reputation and restore confidence.

Please note that policy conditions, limits and exclusions apply.

Don't leave it too late.

In a growing digital world, any business will need to consider the risk of data being lost or stolen. Cyber Recovery can help you to protect your business and manage this risk.

If you would like to know more, please get in touch with your broker.
